WYY's New Visionary Leader—Welcome to Our WYY Family

A New Chapter Begins

As the school year kicks off with excitement and anticipation, one figure stands at the forefront of WYY—Principal Wong.

Many of us have already crossed paths with him at the reopening ceremony, but the

question on everyone's mind remains: Who is Principal Wong, really? Let's dive deeper into the person guiding our school into a new era.

A Journey through Education

Principal Wong's 20-year journey in education has made him not only highly experienced in effective teaching and learning, but also in strategic management.

Before joining our WYY family, he embraced nearly every role imaginable, including Curriculum Coordinator, Discipline Master, Staff Development Coordinator & Principal. His passion for teaching and his innovative approach to curriculum development earned him the prestigious Chief Executive's Award for Teaching Excellence in the Chinese Language Education Learning Area in 2015. Yet it's not the accolades that define Mr. Wong; it's his unwavering commitment to watching his students flourish and achieve their dreams.

An Eclectic Mind

When it comes to reading, Principal Wong prefers traditional books to digital platforms. His bookshelf boasts a delightful mix of management strategies, the enchanting world of Harry Potter, and profound philosophical insights, including the works of Han Fei Zi. This eclectic taste reflects his belief in a well-rounded education—one that balances academic rigor with creativity and imagination. He encourages students to explore diverse interests and find inspiration in unexpected places.

Unveiling Principal Wong

There's nothing quite like the joy of seeing students reach their goal of attending their ideal university—this drives him every day.

Overcoming Adversity

Life hasn't always been smooth sailing for Principal Wong. An unexpected accident led him on a two-year journey of rehabilitation to full recovery, a challenging time that tested his resilience. However, this experience only strengthened his determination to return to education with renewed vigor and enthusiasm. Now, he's ready to make a lasting impact at WYY, inspiring students with his story of perseverance.

An Approachable Leader

What truly sets Principal Wong apart is his infectious spirit and approachability. Describing himself as playful and cordial, he thrives on building connections with students. "I encourage students to come find me or even ask me to lunch," he shares, embodying the belief that meaningful relationships are the cornerstone of a thriving school environment. His willingness to engage with students extends beyond casual chats; he's even expressed a desire to step into the classroom as a substitute teacher, seamlessly blending the roles of leader and educator. Imagine having a principal who's not just an authority figure, but also a mentor and friend!

A Vision for WYY

During his tenure, Principal Wong envisions a vibrant WYY where students can explore their passions while maintaining a healthy balance between academics and extracurricular activities. He recognizes the immense potential in our student body—energetic, curious, and eager to learn—but believes there's always room for improvement in proactivity and confidence. His motto, "Work hard, play hard," encapsulates his philosophy of education, urging students to embrace both diligence and joy. Picture a school where every student feels empowered to pursue their interests while excelling academically!

Advice for Future Success

As students prepare to venture into university life, Principal Wong offers invaluable advice: "Join an exchange group! Explore the lives and cultures of other nations. Your vision shouldn't be confined to Hong Kong." He emphasizes that stepping outside one's comfort zone is crucial for personal growth. "Every time you succumb to fear, you limit your possibilities. The only way to escape that vortex is to take the first step." This call to action encourages students to embrace new experiences and broaden their horizons.

Embracing a New Vision

As we embark on this exciting school year with Principal Wong at the helm, let's embrace his vision and take those first steps together. With his guidance, we're sure to discover new horizons, cultivate our passions, and thrive in ways we never thought possible. Together, let's make this year unforgettable!

Pushing Boundaries in Cancer Research:

5A Heyden Li
5A Remi Li

Our Journey to Geneva

Previous Achievements in iGEM in Paris: A Strong Foundation

Our 2024 project, Antimicrobial Black Soldier Fly Ecoplaster, finished in the top five of high school teams for "Best Education" and "Best Sustainable Development" in the iGEM competition held in Paris. This year, we're pushing ourselves again, exceeding everyone's expectations. We created KAPI.

It is an anti-cancer peptide that may be used with cisplatin to eliminate non-small lung cancer cells. This minimizes cisplatin dosage and side effects. The combination of KAPI, a completely novel anticancer peptide, with cisplatin provides an alternative treatment option for lung cancer. We achieved global top-five rankings in the high school division for both the 'Best Education' and 'Best Model' award categories. Although the competition has ended, our story does not stop there.

A Grand Stage: The 50th International Exhibition of Inventions Geneva

In April, we stepped onto a far grander stage: the 50th International Exhibition of Inventions Geneva at Palexpo. With our new anti-cancer peptide KAPI, designed to synergize with cisplatin against non-small cell lung cancer, we were not just presenting research. We were challenging ourselves to redefine oncology's frontiers—and unexpectedly, Geneva redefined us.

Walking into the exhibition felt like entering the Olympics of innovation. A record 1,043 inventions from 42 countries filled the space. For five days, we explained KAPI's mechanism to a diverse audience—from international judges and curious tourists to bright-eyed students. Time and again, visitors lingered at our posters, their fascination evident as they asked detailed questions about peptide synthesis mechanisms or cisplatin synergy. Many explicitly praised our team's genuine passion for translational research, with one Swiss pharmacologist noting, 'It's refreshing to see such ambition in young scientists.'

Engaging with Experts: Masterclasses in Innovation

The dialogues deepened when university students and professors joined the conversation. Graduate researchers dissected our molecular docking simulations, suggesting optimizations for binding affinity assays. A cancer biology professor spent 40 minutes discussing clinical hurdles, urging us to preempt pharmacokinetic challenges early. These interactions weren't merely instructive; they were masterclasses in bridging innovation and application.

Personal Transformation: Growth through Engagement

Beyond technical growth, the relentless engagement transformed us personally. Presenting complex science to strangers daily dissolved our earlier hesitations—replacing them with unwavering confidence to articulate, defend, and refine our vision. Each conversation boosted our ability to distill complex concepts into accessible insights.

A Lasting Impact: Balancing Innovation and Wonder

In both Paris and Geneva, science wasn't confined to exhibition halls. It lived in the mathematics of swan wings cutting through water, the chemistry of alpine cheese meeting wine, and the physics of sunlight stretching across the Eiffel Tower. These evenings taught us balance: that relentless innovation needs pauses—for awe, for shared bread, for quiet gazes toward distant peaks. We returned to the lab not just with sharper global minds, but with fuller hearts, reminded that discovery thrives when we honor both rigor and wonder.

A Unique Australian Journey as a Tung Wah Ambassador

This year, Yim Fei distinguished herself as a remarkable Tung Wah Ambassador, earning this prestigious opportunity through her dedication and hard work. Her selection reflects her outstanding qualities and commitment to representing the Tung Wah organization. Let's explore the experiences she had during her journey and the valuable lessons she learned along the way.

Preparation for the Study Tour

In the lead-up to their study tour in Australia, Yim Fei and the team immersed themselves in learning about Chinese-Australian history. They attended lectures that deepened their understanding of the rich cultural heritage of the Chinese community. Additionally, they visited significant sites like the Tung Wah Archives and Heritage Centre, where they could connect with the historical artifacts and stories that shaped their community.

A crucial aspect of their preparation was the training for an a cappella performance, which would showcase their talents in front of board members. This experience not only required musical skill but also teamwork and collaboration among students from diverse backgrounds, setting the stage for lifelong friendships.

Highlights of the Tour

From October 4th to 13th, Yim Fei and the team embarked on an enlightening journey through Melbourne and Sydney. In Melbourne, they explored various museums, such as the Gold Dragon Museum and the Immigration Museum. Each visit offered them a glimpse into the lives and struggles of the local Chinese community, enriching their understanding of the immigrant experience.

They also visited Chinatown and a historic Chinese cemetery, which provided firsthand insights into the contributions and sacrifices of past generations. These experiences were both profound and humbling, allowing the students to appreciate their cultural roots.

In Sydney, the exploration continued with visits to iconic landmarks like the Sydney Opera House and the University of New South Wales. They learned about the challenges faced by the local Chinese community through visits to the Hong Kong Economic and Trade Office and the Chinese Consulate General. These engagements highlighted the ongoing importance of community support and advocacy.

Overcoming Challenges

One of the most significant challenges for Yim Fei and the group was their a cappella performance. Many members were new to this format, which led to initial nervousness and uncertainty. However, their instructor organized icebreaker games to foster a sense of camaraderie and ease the tension. This supportive environment allowed them to bond and build confidence.

As the training progressed, Yim Fei embraced the role of lead singer, navigating the complexities of harmonizing with over twenty voices. Through dedication, practice, and encouragement from peers, they transformed their initial confusion into a polished performance that left a lasting impression on the audience.

Key Takeaways!!!

Yim Fei's journey as a Tung Wah Ambassador was not just about representing an organization; it was a transformative experience. She gained a deeper understanding of the local Chinese community and the significant contributions of Tung Wah in Australia. The friendships formed during this journey were invaluable, proving that stepping out of one's comfort zone can lead to meaningful connections.

Through her experiences, Yim Fei has shown that growth often happens outside the classroom, in moments of challenge, exploration, and friendship. Yim Fei often emphasizes the importance of embracing extracurricular activities as a vital part of education. She encourages fellow students to seize every opportunity, whether in academics or beyond, to enjoy their campus life fully and contribute positively to society.

Exploring Scotland 9,000 Kilometres Away from Home

5D Kevin Ching & Parco Lui

During this Easter holiday, we participated in the Tung Wah Joint Schools Cultural and English Learning Study Tour. After a long 17-hour flight, we landed in Scotland's capital city, Edinburgh. For nine days we explored Scotland's biggest cities—Edinburgh, Glasgow, Aberdeen, and Inverness—and each city amazed us.

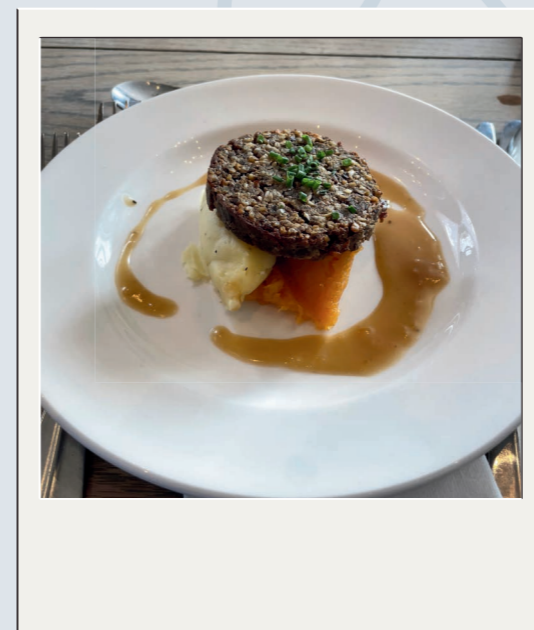

Feeling the Sense of Edinburgh

We started at Edinburgh Castle, the city's highest point. The views over the city were stunning, and wandering through the ancient royal buildings and military barracks gave us a deep sense of history, which is something we rarely feel in ultra-modern Hong Kong. Walking through the streets of Edinburgh's Old Town felt like being in a fairy tale. Stone buildings, quirky Scottish shops, and cobblestone roads created a vibe totally different from the vibe of our home.

Visiting Universities

Our tours of the University of St. Andrews and the University of Glasgow were inspiring. Student representatives showed us around the centuries-old campuses, sharing stories about academic life. The deep history of education in Scotland and its uniqueness made us appreciate Scotland's educational legacy even more.

The Food Scene

We had heard Scotland was a "food desert," but we disagree! The beef there was tasty, the breads were hearty, and the desserts were delightful. And yes — we tried haggis, the famous traditional Scottish food. We thought our Chinese taste buds would not find it yummy; however, we found it savoury, peppery, and honestly delicious. Don't knock it until you try it!

Meeting Locals

Chatting with Edinburgh students was a highlight for us. They walked us through hidden corners of the city, and we swapped school stories. We were shocked by the friendliness of all the locals. We thought there might be a cultural barrier between us and the locals, but we found it easy to chat with foreigners!

A Meaningful Highlight

On the last day of our trip, we visited the Chinese Consulate-General and met Consul Zhang. He spoke warmly about China's global role and encouraged us to contribute to China. When we sang 《我和我的祖国》 (My People, My Country), he smiled and praised us. This was a proud moment to conclude our trip.

Scotland truly surprised us with its layers of history, the kindness of locals, and even the food. From castle skies to consulate conversations, it was a trip packed with learning and memories to cherish.

From Scholarship to Stardom: THE INSPIRING JOURNEY OF WYY'S OUTSTANDING ALUMNI

At WYY, the journey from student to standout alumnus is filled with passion, determination, and the occasional twist of fate. While some students chase prestigious scholarships, others carve their own paths, demonstrating that success is not solely defined by financial aid. Let's explore the inspiring stories of three WYY alumni from Class 2021: Ricky Leung, Sherman Tang, and Vincent Liu—who have transformed challenges into triumphs! Who knows? Perhaps you can be one of them in the future!

RICKY LEUNG The Professional of Work-Life Balance

If you are a member of the Red Cross, you may know Ricky, who is currently the Youth Unit Trainer for our school's Red Cross unit (YU324). But do you know that he is also the recipient of a number of scholarships at the Chinese University of Hong Kong (CUHK)? After graduating from WYY, he continued his involvement with the Red Cross and became the Secretary of the Hong Kong Red Cross University Club.

Deeply rooted in social service, Ricky has received several scholarships; for instance, he has been awarded the AIA Scholarship for three consecutive years! Additionally, he captured the Distinguished Student Service Award at CUHK, which is only given to those who show outstanding contributions to student activities. This highlights his dedication to student service and responsible personality.

Beyond serving others, the most admirable part of Ricky's story is his effective time management. As students, we all struggle with juggling our time, but not Ricky—he knows how to strike a balance between academics and extracurricular activities. This year, he received the Wat Mo Ki Memorial Scholarship for Balanced Education, awarded to students who excel in academic pursuits, extracurricular activities, and contributions to university life. As a Year 4 student in the Department of Biomedical Engineering (BME), he has gained extensive experience through internships and competitions outside of school, such as the BME Lab Exposure Programme in 2021, the Summer Research Internship Programme in 2022, and iGEM in 2024. Furthermore, he has received the BME Outstanding Achievement Scholarship from 2021 to 2023 and the John L. Soong Scholarship in 2024, awarded to the top academically performing student demonstrating proven leadership and potential for future development, showcasing his exceptional time management skills and work-life balance—an essential skill for all of us to learn.

SHERMAN TANG

Redefining Mastery in Chinese Language

In the vibrant world of linguistics, few stories resonate as profoundly as that of Sherman Tang, a proud alumnus of WYY. With a Bachelor's degree in Chinese Language Education at the Education University of Hong Kong, her brilliant research has been published in a book alongside the works of renowned professors. Sherman Tang has not only embraced her passion but has also emerged as a beacon of perseverance and dedication.

From her early days at WYY, Sherman demonstrated an unwavering commitment to her studies. What truly set her apart was her relentless work ethic. While others might have settled for mediocrity, Sherman pushed herself beyond limits, spending countless hours refining her Chinese skills and immersing herself in the nuances of the language, greatly honing her abilities. This dedication allowed her to capture various scholarships throughout her university life, including the Dr. Li Dak Sum Language Immersion Scholarships and the Dr. Li Wai Shing Memorial Scholarship from 2023 to 2024. Today, Sherman stands as a remarkable example of what dedication can achieve.

As she continues to inspire those around her, one thing is clear: Sherman is not just an alumnus of WYY; she is a testament to the transformative power of hard work and dedication in the pursuit of excellence.

Interview!!

VINCENT LIU The Alchemist of Words

In a world where words hold the power to connect people, Vincent Liu stands out for his mastery of language. As a Year 4 student majoring in Translation at Hong Kong University of Science and Technology, he has transformed his love for languages into a dynamic pursuit, skillfully bridging cultures and ideas with every translation.

Vincent's command of English is exceptional. He navigates the language with ease, making complex ideas accessible and relatable. His fluency has opened doors to numerous opportunities for growth, allowing him to earn several scholarships. From 2022 to 2023, he received the BA Translation Second-Year Scholarship and the Equity Financial Press Limited Scholarship, highlighting his proficiency and outstanding achievements.

As he continues on his journey, Vincent embodies the spirit of a cultural ambassador, reminding us that translation goes beyond mere words—it's about fostering understanding and connection. With his unwavering determination and passion, Vincent is set to inspire others, proving that the journey through language is a captivating adventure with limitless possibilities.

Class of 2021

WYY alumni consistently reflect on the principle of proactivity. "Don't wait for opportunities to come to you," advises Vincent Liu. "You need to be the one to reach out, apply, and embrace the challenges." This mindset is crucial in a competitive landscape where self-advocacy can set you apart.

As we delve deeper into these stories, it becomes clear that the legacy of WYY is not just about accolades; it's about resilience and the willingness to forge a unique path. These alumni are not just recipients of scholarships; they are innovators, advocates, and leaders who have made significant contributions to their fields.

The journey of a WYY alumnus is a testament to the power of determination and the value of proactive engagement. So, whether you're applying for scholarships or crafting your own future, remember: your story is just beginning, and the possibilities are endless. Embrace them!

YOU CAN DO IT TOO!
Take the Opportunity!

Pathway to Excellent Journalism—Annie Cheng's Inspiring Journey

The former Vice President of NOW TV News, Annie Cheng, shares her captivating journey through the world of journalism, highlighting the lessons learned and the passion that drives her.

A Lifelong Dream

"I have always wanted to be a journalist since I was in Form Four, and this dream has never changed," Annie said with a confident smile. After 30 years in the field, she has kept her teenage dream alive."

Making History through Interviews

As an outstanding journalist, Annie has interviewed notable figures such as Jiang Zemin, the former President of the People's Republic of China, and Carrie Lam, the former Chief Executive of Hong Kong. "I want to be part of history, and that's the reason for being a journalist!" she stated firmly when asked about her purpose in the industry.

Annie outlined two essential motivations for entering journalism: meeting diverse people from all walks of life and uncovering the stories behind them. She emphasized that journalists witness and write 'the first draft of history'. The importance of this responsibility continuously drives her career forward.

Embracing Feedback and Upholding Principles

"If you believe in your professional judgment, it's okay to face negative comments," Annie noted. She believes that encountering criticism is a part of any profession. The key is to maintain your principles and report the facts and accurately. "If you believe you are doing the right thing and telling the truth, you have nothing to fear."

The Art of Interviewing

Being a journalist requires a diverse set of skills. Annie likens the act of interviewing to "cooking." Preparation is vital for success. Conducting thorough research and identifying original sources ensures that your questions fit the interviews perfectly, which demands hard work and engagement.

Your senses play a crucial role during interviews. With your eyes, you can observe the interviewee's facial expressions; with your ears, you can capture important points for your writing; and with your brain, you can formulate instant questions. Thus, being a journalist is no easy task; practical skills are essential.

A Fulfilling Career

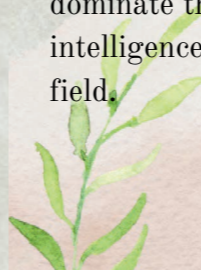

My job is fulfilling and has enriched my life," Annie reflects. From interviewing the President of the People's Republic of China to connecting with an elderly person on the street, she has given various individuals a platform to express their thoughts and concerns

Interestingly, Annie did not initially enroll in a journalism program at university. She began her journey in 1993, when Cable TV emerged in the public spotlight, seizing the opportunity to expand her knowledge. Having witnessed the launch of various news channels, including Cable TV, TVB, and Now TV, she worked hard to realize her dream. Annie expressed her deepest gratitude to the Chief Editor at Cable TV, acknowledging the significant impact he had on her career by always being willing to teach newcomers and share essential skills. Having learned from him, Annie is now dedicated to nurturing the next generation and passing on the torch.

The Role of AI in Journalism

Annie describes AI as a double-edged sword, possessing both advantages and disadvantages. On the positive side, AI can assist with basic tasks such as translation and research, making processes more convenient. However, the role of journalists remains irreplaceable. Interviews are fundamentally about human interaction and emotional connection. While AI may provide valuable insights, it should never dominate the journalism process. Combining human intelligence with AI can help journalists excel in their field.

Navigating the Landscape of Misinformation

With fake images and generated posts rampant online, discerning which sources to trust is crucial. Annie Cheng offers constructive suggestions: If you find a post confusing, check reliable media outlets like Cable TV and Now TV. Alternatively, investigate original sources online and understand the community's reactions. Annie emphasizes the importance of critical thinking, especially in an age rife with misinformation. "Think before you act."

Pursuing Your Journalism Dreams

Having a dream is important, but achieving it requires hard work. A strong foundation in languages, particularly Chinese and English, is essential, along with diverse skills such as report writing and video editing. The most crucial aspect is proactivity. You need to be proactive in "cooking" a good report — always ready to interview and encourage interviewees to speak up. Show warmth and empathy in your interactions. Soft skills, passion, and energy are vital attributes for any journalist.

Although Annie is now the Director of a consulting firm rather than a journalist, her experiences and principles continue to inspire us to reflect on our own aspirations. She is a remarkable role model, and her passion and energy in her work are truly impressive. There is so much we can learn from her

Championship Win at the Robotics and Programming Competition

This year, our school participated in a robotics and programming competition co-organized by Caltex and The Boys' & Girls' Club Association of Hong Kong, and we captured the championship!

According to the teacher in charge, Ms Wong Ka Yin, the contest was a great way to promote programming among junior-form students. The event provided free coding classes to students and offered them a chance to compete in designated challenges, such as building robotic cars. Although the preparation was tough, participating students said they enjoyed working and learning alongside their friends as a team.

The competition itself required problem-solving and quick thinking. Through the experience, 4A Liao Chun Wa learned technical skills, the power of teamwork, and gained greater confidence. One student admitted that he initially felt unsure at the beginning and only joined the event to accompany his friend. Yet, he said that now he has no regrets—especially after winning first place! Their message to future participants: Don't be afraid to try new things; taking a step into the unknown is how we grow!

A Terrific Art-chievement!

Let's give a round of applause to three of our wonderful senior-form schoolmates, who were honoured with a Merit Award in the 'TWGH's Ginny Man Chinese Cultural & Creativity Prize 2024', earning an award of five thousand dollars for their wonderfully designed tabletop role-playing game (TRPG)!

The Heart & Soul Poured into "The Birth of Soaring Dragons"

Their remarkable game was themed on Chinese dragons, created with thoughtful Chinese ancient scripts, adorable Japanese-style characters, and tailor-made dyes. 'It took us around half a year to make this game. We had to come up with an intriguing yet ascending-order storyline with an alluring yet dragon-related theme,' explained Abby Lau from 5A, one of the winners.

Heartfelt Messages from Artistic Souls

Abby saw the competition itself as a game rather than a serious test. 'Actually, the results were less important than the process and the invaluable lessons we learnt along the way. Those lessons, and the friendships we have formed, give us the most satisfaction.'

Mr. Wong Kam Nam, WYY's VA teacher, praised the three students, 'All three of them are cordial, imaginative, and versatile. They make me proud, and I couldn't be happier for them.'

THE INSPIRING JOURNEY OF MS MAK: A PASSION FOR SPORTS AND EDUCATION

–Introduction–

As Ms Mak approaches her retirement, we would like to express our heartfelt appreciation to her invaluable contributions to our school over the years.

–Early Life and Education–

Ms Mak grew up in the local district, attending Sheng Kung Hui Lam Woo Memorial Secondary School before enrolling at the Education University of Hong Kong, where she majored in physical education. Her love for sports was ignited in childhood by playing tag and racing in her estate's long corridors. 'In secondary school, I joined the track and field, volleyball, and basketball teams. Sports became an integral part of my life, and I am grateful to have turned my passion into a career as a physical education teacher,' she shared. As Ms Mak approaches her retirement, we would like to express our heartfelt appreciation to her invaluable contributions to our school over the years.

–Memorable Moment –

When asked about memorable moments in her sports career, she recalled two poignant experiences watching her students compete. 'Seeing their dedication brought me to tears,' she explained. 'Whether they won or lost, their passion and commitment truly touched me.'

–The Role of Physical Education–

In her PE classes, teamwork is a focal point. Group activities are common, and she emphasizes the importance of collaboration. 'I hope that through physical education, students can build strong relationships and a sense of teamwork,' she said. Transitioning into her role as a physical education teacher, she found that her impact extends beyond sports. 'I realized I could be a listener and a source of support for students,' she noted. Many students trust her enough to share their struggles, and she embraces this role wholeheartedly.

–Teamwork and Leadership–

Her experiences as an athlete have deeply influenced her views on teamwork and leadership. 'I encourage students to engage in team sports to develop communication and collaboration skills,' she emphasized. Beyond physical benefits, sports teach essential life lessons about support and sacrifice. When discussing setbacks, she advised students to persist despite challenges. 'Every athlete faces obstacles, but maintaining a positive mindset is crucial,' she stated. She encouraged students to surround themselves with supportive friends during tough times.

–Overcoming Challenges–

Injuries are a common fear for athletes, and Ms Mak faced her own challenges early on with a meniscus injury. 'I pushed through it at the time, but now I feel the effects,' she reflected. Her regret is palpable, wishing she had listened to medical advice. 'I undergo physiotherapy twice a week now, hoping to manage my physical condition better.'

–A Multifaceted Athlete–

Her athletic career spans multiple sports, including volleyball, basketball, badminton, and handball. 'I've always been eager to explore new sports,' she reflected, noting her experiences with dragon boat racing and football in university. For students looking to improve their badminton skills or pursue a sports career, she emphasizes dedication. 'Talent alone isn't enough. Hard work is just as important,' she advised. Continuous practice, even for those not naturally gifted, can lead to significant improvement over time.

Editors' Words

In this Glitter edition, we celebrate the brilliance of WYY students, the thrill of new adventures, and the heartfelt stories from our dedicated teachers, alumni, and our new Principal.

Embark on a journey of inspiration as we showcase the success stories from our WYY community members! From groundbreaking awards to enriching exchange tours, each journey highlights their determination and creativity, proving that anything is possible with hard work.

Special thanks must go to all the Glitter members, reporters, editors, and our teacher advisors for their efforts and dedication in making this year's Glitter possible. On behalf of everyone, we hope this edition fills you with joy and inspiration. Enjoy the read!
