

Andy: (Playing smart phone) Oh! I'm bored.

Anson: any other things to do?

Daniel : You may play Sudoku ! It is a mighty game created by alien called Tony Yu. He is a smart alien, it likes to ask people questions. One day alien Tony Yu was bored, so, it wanted to play with other aliens, but they were scared of Tony Yu, so he designed a game called Sudoku. We play it like this (play in a wrong way.)

Andy : Oh....What..?Sudoku and alien Tony Yu? What are you talking about?

Anson : What's wrong with you?? Sudoku was first called Number Place, is a logic-based, number-placement puzzle. The objective is to fill a 9 by 9 grid with numbers, so that each column, each row, and each 3 by 3 small grids will have the number 1-9.

Andy: The puzzle setter provides a partially completed grid, which typically has a unique solution.

Elaine: Do you know that this game was not called Sudoku before? It was called Number Place before! This puzzle was first published in New York by a magazine called Dell Magazines.

Melissa: Later, a Japanese company Nikoli introduce this game to Japan. It was so popular and it got a new name Sudoku!

Elaine: Right! Also, Sudoku has a lot of different methods. We can change the numbers to English letters , like A, B, C. We called iti forgot

Andy: 'Alphabetical Sudoku'.

Melissa: right! If you think it is boring, you can change the grid from 9 by 9 to 4 by 4 or 16 by 16.

Elaine: And we have Mini Sudoku , Cross Sums Sudoku and Killer Sudoku. They are all really fun.

Daniel : OH I know that...

Andy: So..lets play Sudoku~

Others: OK, that would be fun
