J: Hey Sean

S: Hey Jerry

J: Where have you been to? I have rarely met you here.

S: I've just been to the cinema in order to watch the movie "Life of Pi".

J: Is that interesting?

S:Yes, it is

J: Well, do you know there is a Mathematic symbol also called Pi?

S:Yes, I do. I know that Pi is a mathematical constant that is the ratio of a circle's circumference to its diameter, and is approximately equal to 3.14159 and it is come from a Greek letter "π".

J: Well, you are right but it is just the simply explanation of Pi. Moreover, π is an irrational number, which means that a number has no end. There are many mathematicians studied Pi, in China, there was Liu Hui. Around the world, there is also Isaac Newton.

S: Wow, that sounds amazing!

J: π helps people to calculate the area and the perimeter of circle. It is an important discovery in mathematics.

S: But the value of Pi hasn't been found the actual value. Nowadays, the mathematicians are still working hard to the end of Pi.

J: Yes. Now, the value Pi has just been calculated to 3.14159 26535 89793 23846 something.

S: Wow! Umm….. Time flies. It's time to go now. I have to back home. Great to have a little chat with you. Hope to talk with you next time. Bye Jerry.

J: Bye Sean.
