## December 21st 2012 = our <u>Doomsday</u>?

| <u>Rumour</u> has it that |  | BUT Scientists expect nothing special will happen. |   |
|---------------------------|--|--|---|
| ı                         | It is the end of the Mayan 馬雅族人的 calendar.                 | -  | It may be the start of a new <u>era.</u>                    |
| 1                         | "Planet X" or "Planet Nibiru" will hit Earth and cause a   | -  | "Planet X" and "Nibiru" simply don't exist.                 |
|                           | range of <i>natural disasters</i> .                        |  |   |
| -                         | The North and South Pole will change positions, which will | -  | <u>Polar shift</u> roughly takes 5000 years to complete and |
|                           | remove the earth's magnetic field, and thus expose Earth   |  | doesn't start on a specific date and time.                  |
|                           | to space radiation and solar storms.                       |  |   |

Many people want to spread this rumour because they want to promote their books & TV shows and to earn money out of it.

## So, remember to finish your homework every day and prepare for school the next day!

| Doomsday          | The end of the world  |
|-------------------|---|
| Rumour            | Information about something that may or may not be true                                       |
| Era               | A period of time in history   |
| Natural disasters | Something caused by nature that brings great damage or suffering such as a flood or rainstorm |
| Polar shift       | The change of the position of the North and the South Pole                                    |
| Space radiation   | The heat or light energy that comes from space  |
