

### **3B Class Presentation Script**

**Title : End Of The World – Doomsday**

#### **Scene 1**

(show PPT)( some people are driving...)

**Narrator:** One day the God saw this situation that the earth is going to end by the humans, then the God decided to go down to earth and talked to the humans...

The humans keep polluting the environment ...like driving, at that moment the God arrived

**God (blame and angry):** Hey, What are you guys doing here ?

(The time pause...)

**Family (surprised):**Who are you?

**God:** I am the God of the world!

**Family(shocked):**What? Unbelievable! You are the God! There is no God in the world! We won't trust you!

**Son:** Who are you and why are you here?

**God:** If the earth keeps being like this, the world will end. That's all!

**Family(scared):** So what can we do now?

**God:** I will give you guys three days to raise your environmental awareness. If three days later I cannot see the change of the human beings, the world must end ...

(The God has gone)

**Family:** Perhaps we should do something to save the earth...

#### **Scene 2**

(Back in time, the people are walking backward...)

**Narrator:** The family went back to the past and they started to raise

humans' environmental awareness...

The family went to Jack's home

(Jack was brushing his teeth but after that he didn't turn off the water tap then he went out from the bathroom)

**Family:** Do you know you are wasting the water? And it will cause the end of the world easily.

**Jack:** Come on...I just turned on the water tap for few minutes. It doesn't really matter.

**Family:** No, You are wrong! If everyone on the earth does not turn off the water tap whatever they use for, it will waste much water!

**Jack (feel sorry):** You are right!

(then Jack turned the water tap off immediately)

### **Scene 3 (at school)**

**Ss A:** Have you finished your lunch?

**SsB:** I can't finish it at all... I am going to dispose it ...

**Family (pointing at Ss B):** Stop! You have left a lot of food. I think you should separate the food and polystyrene boxes in order to save some space. So the landfill will not be full too quickly. Polystyrene is not biodegradable. It also releases toxic chemicals and pollutes the soil, threatening the lives of the living things.

**Ss B:** But I think it is very inconvenient, why not take an easier way?

**Family1:** Although it will cause some inconvenience, if we can do something to help our earth, why not?

**Family 2:** Yes, as you know that the landfills in Hong Kong are going to be full very soon, we should slow down the process as much as possible. We can have a better environment too.

**Ss A and B:** We are very sorry about that. We are going to separate the food and polystyrene now!

“3B Oh yeah!

I have some food. I have polystyrene.

Food and Polystyrene

Separate food. Separate boxes.

Separate them

Food, polystyrene, separate them.

We had done it! We can do it!

We had done it! We can do it!”

#### **Scene 4 (Car park)**

(Sam is driving his car to the car park. He arrived at the car park but he didn't switch off the engine. He was playing with his phone and listening to some pop music inside the car...)

(The family saw that and they walked over to tell him...)

**Family:** Hey! Why didn't you switch off the engine?

**Sam:** Why do I need to switch off the engine? It is very convenient and I just parked here for a while because I am waiting for my friends. They will come soon. Also, it is very hot today, if I switch off the engine, I cannot enjoy the comfortable air conditioning and my car will become very hot.

**Family:** You are wrong! Don't you know that? If you don't switch off the engine, it will lead to a lot of bad consequences.

**Sam (surprised):** I do not understand! What do you mean?

**Family:** Let me tell you. If you do not switch off the engine, your car will emit some toxic gases such as carbon dioxide, carbon monoxide, nitrogen oxide and carbon dioxide. They are greenhouse gases, which will worsen global warming.'

**Sam:** Oh my god, that's terrible! I shouldn't endanger the health of the earth. We have to safeguard our earth together.

(Then Sam switched off the engine immediately)

## **The ending**

**Narrator:** The family returned from the past.

**The family:** Have we saved the Earth? Is the world going to end?

**Narrator:** The God came again ...

**God:** Don't worry! You guys had done a great job!

**Family:** Yeah! Thank, God ! The earth is going to end without your reminder!

**God:** You don't need to say thank you to me! The clue to make a change is you – and everyone on this earth!

(showing that the people on the earth are still destroying the environment and the family is going to teach them to be right again )

**Family:** So now you guys know how important it is to protect the environment?

**All:** Yes!!

**The End**
