

## **Class 1C Presentation**

### **Topic: Water Cycle**

**Characters: son (Tony), dad, rain, cloud, sun, river, grass, narrator**

#### Scene 1

Narrator: One day, Tony came back home and went into daddy's room.

(Son comes back home, walks into daddy's room) (Knock the door)

Son: Daddy can you teach me what 'Water Cycle' is?

Dad: I'm so busy. I'll teach you later.

(Daddy walks away and leaves the stage)

(Tony sits down, reads the book and falls asleep)

Narrator: Tony is very disappointed and he fell asleep.

#### Scene 2

(Son is dreaming)

(Son walks to somewhere he doesn't know)

Rain: (waves his hands) Hi! Welcome to the sky world.

Son: (scared) Woah! Who are you?

Rain: I am the rain of the sky. I know you want to know more about me, so I come here to tell you.

Son: (Happily) Yes, I learnt the 'Water Cycle' at school, but I don't understand it at all. Can you let me know what 'Water Cycle' is?

Rain: Sure! Do you know before raining, where I come from?

Son: I only know hot air rises up and cold air drops down, I'm not sure about the other things.

Rain: Let me tell you what is happening before I fall down.

(Sun, cloud come out) When the temperature is hot with low humidity, part of me in river (river comes out) absorbs energy from the sun (cloud

lets the ribbons go). Water evaporates to become water vapour. Then, it is carried upward by warm air.

Son: And then what changes?

Rain: Water vapour cools and condenses, forming clouds (cloud turn). (rain comes out) Water droplets fall from clouds as me!

Rain: When I feel cool, I fall down. I will then move along the river and meet other living organisms.

(Grass gets on the stage)

Grass: (Happily) Yes! The rain meets me! I want to thank rain so much! If rain had not helped me, I would not have grown so fast and healthily!

Rain: You are welcome! We are friends, aren't we?

(Sun comes out sneakily)

Rain: Now you may understand more about me, do you have another question or misunderstanding?

Son: No, thank you very much!

(When Rain sees sun, he becomes very scared)

Rain: Oh! The sun is here! I can't stay any longer.

(Rain and Sun leave the stage)

### Scene 3

(Son wakes up) (Father is free)

Narrator: Tony wakes up from his dream.

Dad: Son, do you understand what 'Water Cycle' is? I'm free now, let me teach you.

Son: No, thanks. A few minutes ago, rain had come to teach me already. Let me show you what I understand.

(Dad frowns)
