

*F.1 Text to be posted on English iZone (December):*

Directions: Complete this passage by writing the correct missing words from the Word Box on your worksheet.

Population growth has different causes (原因). One cause can be a higher **(1)**\_\_\_\_\_, which means more babies are being born. Another cause can be **(2)**\_\_\_\_\_, which is when people move to another country in order to live there. A person who does this is called an **(3)**\_\_\_\_\_. However, person who moves away from his/her country to live in another country is called an **(4)**\_\_\_\_\_. A third cause of population growth is people living longer, which makes a lower **(5)**\_\_\_\_\_. For example, in China the **(6)**\_\_\_\_\_ of males is now 75 years; for females it is 77.9 years.

Population growth has many effects (結果). For example, if we have more people than we can support, we have the problem of **(7)**\_\_\_\_\_. If we have too many people living in one area and too few living in another area, we have the problem of **(8)**\_\_\_\_\_. The area with too many people will be **(9)**\_\_\_\_\_ and the area with too few people will be **(10)**\_\_\_\_\_.

## Monthly Challenge - December (Geography)

Directions: Visit English iZone and complete this worksheet. Return this paper to Mr Lyons on \_\_\_\_\_.

**Part A** – Complete December’s F. 1 iZone reading passage by choosing the correct missing words from the Word Box below.

<b>immigrant</b>	<b>birth rate</b>	<b>densely populated</b>	<b>death rate</b>
<b>emigrant</b>	<b>population density</b>	<b>immigration</b>	
<b>overpopulation</b>	<b>sparsely populated</b>	<b>life expectancy</b>	

1		2	
3		4	
5		6	
7		8	
9		10	

### Part B – Writing

Can you think of an effect (結果) of population growth that is NOT mentioned in December’s iZone reading passage? Why is that effect good or bad?
